

# wafertec pump.

## Refurbishment & repair of Wafertec F30, F32, F1, and S30

amcoss offers refurbishment of your defective Wafertec dispense system (models F30, F32, F1, and S30) in a manner that afterwards it will work as precise and reliable as a new pump. Thus, we provide a perfect and cost-attractive solution, which doesn't only prolong the lifetime of your Wafertec system, but of the whole process equipment at the same time.

The Wafertec pump is a highly accurate device as far as control and precision of resist dispense are concerned. It is contamination through viscous resists, to be specific, which mainly causes malfunction or complete breakdown of the system.

Recently, we also offer the professional refurbishment of the **S30** Wafertec pump model.

### Repair process @ amcoss\_

Before repair

After repair

### Your benefit\_

- // **Already qualified:** no new components to be qualified in your process equipment.
- // **Attractive price:** repair by amcoss is much cheaper than a new pump.
- // **Easy sourcing:** you don't have to look for an alternative supplier. You'll get a fully functional product quickly and in an uncomplicated way.
- // **Time- & cost-saving:** due to less downtime of process equipment. You don't have to invest time and money for the development of a new solution.
- // **Warranty:** 1 year warranty on parts replaced by amcoss.
